The best of form and function

Malibu Boats

*European design for comfort...
Malibu performance for skier.*

The Europeans have a way of creating designs that look and feel good while achieving exceptional performance. That's the idea behind the Malibu Euro-f3 series. Maximizing form for the benefit of function *and fun*.

Clean, contemporary lines. A spacious, well-appointed interior built for comfort as well as style. More storage space than any comparable-size inboard. An advanced "user friendly" cockpit design. Integrated gel coat graphics for a beautiful, well-designed form.

As for function, the Malibu Euro-f3 Skier and Sunsetter excel in performance. Superior hydrodynamics for maximum control, quick response and smooth, super-quiet operation. Precision unibody hull and deck construction for unparalleled strength and quality. A Mercruiser competition powertrain for the ultimate in acceleration, pulling power and reliability.

The Malibu Euro-f3 series. Ideal for the family. . . respected by the most discriminating competition skier. The best of form and function.

 *Malibu Boats*

*Designed for the skier
...and the eye.*

MALIBU

The sleek aerodynamic shape. The brilliant, multi-colored hull and deck. The unique, contemporary design. The Malibu Euro-f3 Skier will undoubtedly turn heads. But the Skier's beauty is much more than skin deep. It has all the performance, power and maneuverability you would expect from this top-notch tournament ski boat.

In a word, the Skier is *FUN!* Fun to drive, fun to ski and fun to ride in. Acceleration is quick and steady. Response is instantaneous and precise. . . the Skier corners on a dime. Features include a distinct V-shape entry with four full-length strakes for an incredibly comfortable ride. Triple hull fins cut an exacting course and wide negative chines provide extra stability, perfect balance and precise tracking.

For skiing . . . there's nothing better. The semi-flat transom produces the finest overall wake for any type of skier — slalom, trick, jump or barefoot. The reliable 260 h.p. Mercruiser ski package really delivers, providing quick take-off power and a steady pull to delight even the most avid skier. And for safety and convenience, the boat's exceptional response allows quick maneuvering to avoid obstacles or pick up fallen skiers.

The Skier's interior is the ultimate blend of good looks, comfort and practicality. Efficient use of space allows for smooth traffic flow. Storage is well-placed and spacious for convenience. The advanced cockpit design provides maximum driver comfort with easy instrument readability and use of controls.

The Malibu Euro-f3 Skier. . . today's great ski boat, any way you look at it. And you'll love looking at it.

*A performance ski boat
with room for the family...*

MALIBU

...the best of both worlds.

This isn't a run-of-the-mill bowrider. The Malibu Euro-f3 Sunsetter is truly a high performance ski boat with a roomy, well-designed interior that makes it ideal for the family.

The Sunsetter boasts an innovative design that efficiently utilizes every inch of space. The result is a carefully planned interior that offers maximum passenger comfort, excellent traffic flow and an incredible amount of storage space. Spacious, well-placed storage areas are located throughout the boat, providing plenty of room for gear. Higher sides mean a secure feel and dry ride. The Sunsetter even includes a sturdy, hideaway suntop as standard equipment.

The Euro-f3 styling gives this bowrider a unique, eye-catching appearance. The Sunsetter's sleek lines are clean and contemporary, accentuated by the brilliant gel coat graphics and meticulous detailing.

But what really sets the Sunsetter apart from other bowriders is *performance*. Like the Skier, this boat is all *fun*. The center-mounted ski pylon is a clue to the Sunsetter's true calling. It has the power, exceptional response and skiability to rival its cousin the Euro-f3 Skier. The quick acceleration, maneuverability and excellent wake characteristics make the Sunsetter a joy to ski and drive. A 260-hp Mercruiser competition inboard ski package delivers plenty of pulling power. The superior hull design ensures positive, precise tracking and excellent stability for a smooth, safe ride.

The Euro-f3 Sunsetter. A skier's boat... a family boat. *The best of both worlds.*

Excellence on the water starts with excellence in design and manufacturing.

Innovative design, professional standards and a management philosophy that encourages a high degree of craftsmanship . . . reasons why Malibu Boats has become one of the most respected boat builders in America.

We design and engineer our boats from the keel up. Our boatbuilders combine extensive experience with high-tech manufacturing methods to achieve consistent, top quality in every component and system. Every step in the boatbuilding process is checked and re-checked to assure the ultimate in quality control. Finally, each boat is lake tested before it qualifies as a Malibu Boat. And we back our hull with a 36-month or 3,600-hour limited warranty.

Malibu's employees participate in a stock ownership program that encourages professional pride and respect in all facets of the boatbuilding process. This collective ownership philosophy results in a product which is now setting new standards . . . a boat you'll be proud to call your own.

The fine detail in Malibu's in-the-mold gel coat striping is truly an art. The striping will not fade and peel off. In the event of damage, the finish can be easily restored by an authorized Malibu dealer. Malibu's state-of-the-art glass and gel coat applications are carried out in a temperature-controlled environment, assuring a brilliant, colorful finish for years of maintenance-free beauty.

In conventional construction, the deck and hull are loosely fitted and joined with screws or rivets, which can corrode or work loose over time.

*Unibody construction, used only by Malibu and the finest boatbuilders, requires precision molding of both the hull and deck to attain an exact fit. This is then bonded together with both fiberglass mat and bi-directional fiberglass to form a **united** body for unparalleled strength and maintenance-free durability.*

Hand-laid fiberglass construction to exacting standards means the ultimate in integrity and durability.

The dependable, smooth-running and powerful Mercruiser inboard competition ski package and high-quality hull components give each Malibu boat the performance edge.

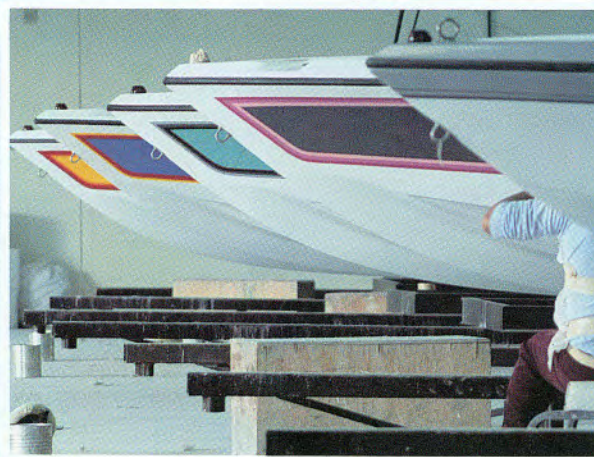

Our in-house steel fabrication department gives Malibu complete control in producing the strongest, highest quality ski pylon mounts, removable swimstep brackets, seat bases and other components.

Malibu's skilled upholsterers use only Naugahyde brand fabrics, considered to be the finest in the industry. We offer a wide array of custom tinted colors to create exciting, long-lasting interiors that provide many years of pride and comfort.

Before shipment, every Malibu boat is subjected to extensive finishing, detailing and final quality control checks.

*Malibu's standard features
make us your only option.*

ALL MALIBU BOATS ARE LAKE TESTED BY OUR FACTORY EXPERTS

*Performance, style,
high quality...that's why
a Malibu is for you.*

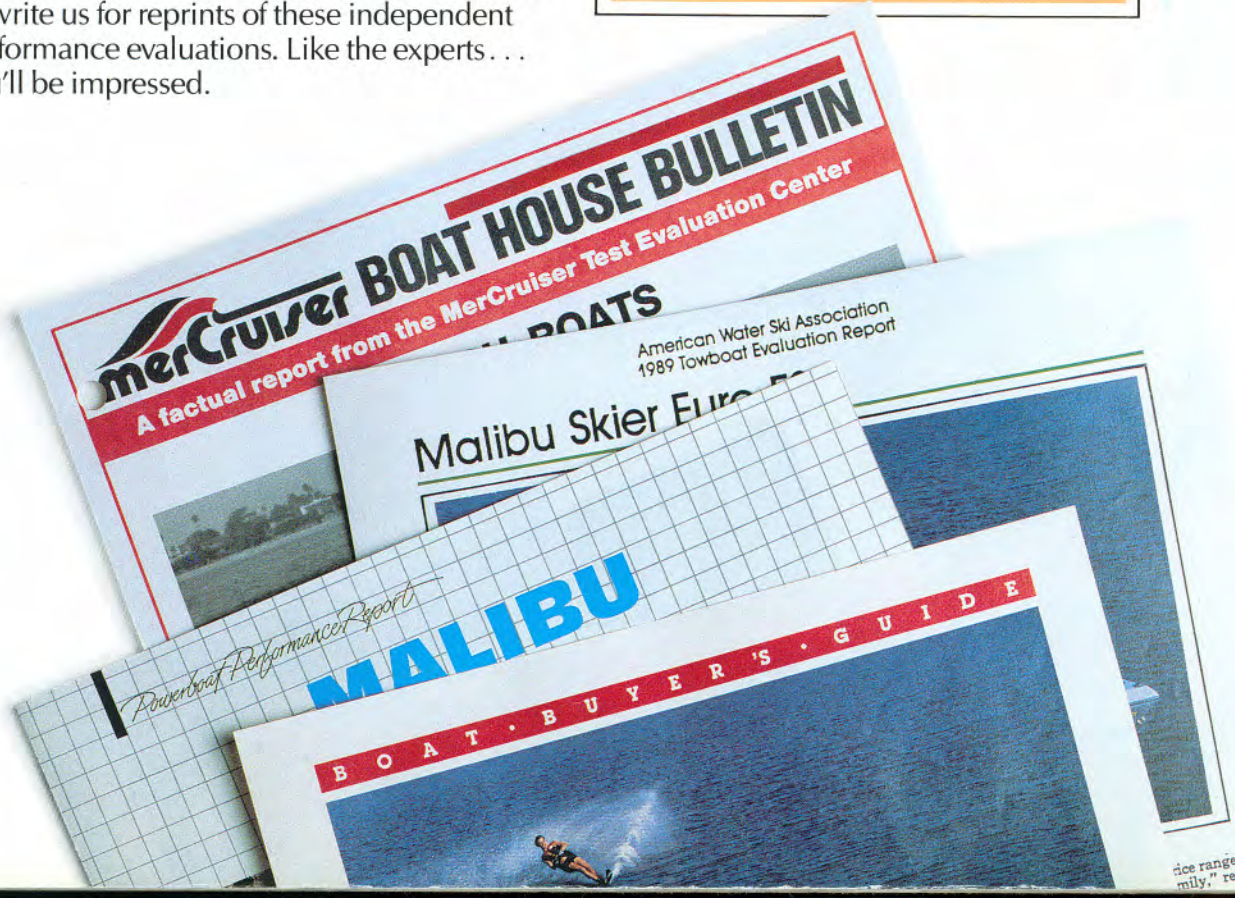

And the experts agree!

Throughout our organization, Malibu employees take notable pride in the innovative design and high workmanship standards that go into each of our boats. And this dedication has paid off.

In test after test, the Malibu Euro-f3 series and our other models have astounded the experts. Our boats have been praised for styling, performance, skiability, workmanship, value and more. But don't just take our word for it. Call or write us for reprints of these independent performance evaluations. Like the experts... you'll be impressed.
