

A Malibu 1999 speedboat is shown from a rear-quarter perspective, moving across the water. The boat is white with a dark stripe along the bottom edge. Two people are visible in the cockpit. The sun is low on the horizon, creating a bright, shimmering wake behind the boat and casting a warm glow over the scene. The sky is a clear, deep blue. In the background, there are rolling hills or mountains under the twilight sky. The overall mood is serene and recreational.

MALIBU 1999

## Real people.

Malibu considers every employee an asset empowered with ownership and interest in every Malibu boat that leaves the factory. We applaud creativity and reward inspired engineering amongst our employees. And like our engineering, our dedication to customer satisfaction has been highly acclaimed throughout the industry. This remarkable reputation is achieved by using the highest

## Real quality.

quality materials, state-of-the-art construction techniques, and an on-going commitment to service excellence. Employee owners, like Clyde Fields, are not driven by quarterly reports to faceless shareholders but are driven to build perfection into every Malibu boat that leaves the factory. Our employee-owned team approach ensures that your Malibu has

been carefully tested for many years of function and beauty. Since Malibu was founded in 1982, our line of competition and family recreational ski boats have been singled out for their unique attributes: exquisite styling, impeccable engineering, meticulous quality and the most gratifying levels of ownership. Our dedication to be the best has allowed us to attain a unique heritage of ski

every Malibu boat. Our priorities are clear: we invest our resources in developing the newest technology for the best engineered ski boats on the market. 1991–Ski Boat of the Year, *Hot Boat Magazine*. 1992–Ski Boat of the Year, *Powerboat Magazine*. 1993–Ski Boat of the Year, *Powerboat Magazine*. 1994–Product Excellence Award for Outstanding Workmanship,

Slip behind the wheel of a Malibu, and you instantly sense that nothing has been forgotten in attending to your personal comfort. We know how hard it can be to comfortably fit passengers and all their gear together. So Malibu designers made certain your friends and family would have plenty of leg room, plenty of storage room and an abundance of comfort.

In fact, they designed the new Malibus with over 20% more bow storage and designed a trunk that provides an additional 12 cubic feet of wakeboard and ski storage above the transom. Throughout, you'll find lush appointments that provide a perfect balance to its athletic prowess. A form-fitted, wrap-around throttle console provides increased comfort and helps minimize driver fatigue. Stereo faceplates have been strategically placed under the driver's armrest for convenient access and

security. Exclusive 5" Kysor Medallion servo-driven instrumentation provides driver

## Uncluttered, spacious, elegant and timeless.

information at a glance with unparalleled accuracy. Deeply bolstered driver's seats with adjustable air lumbar support assure the driver hours of comfort and command. Passengers will find the new

Malibu accommodations equally as pampering with a full array of features like a built-in 40qt. self-draining ice chest, conveniently placed hand rails and a multitude of oversized cup holders. We're certain you'll find the 1999 Malibu line-up to be an abundantly comfortable choice.

RESPONSE LX

## RESPONSE LX

Call it a trophy collector. The Response LX has consistently earned performance ratings of any boat *Water Ski Magazine* ever gave. *PowerBoat Magazine's* most prestigious "Ski Boat of the Year" award, and they threw in the "Outstanding Workmanship" and "Value" awards. But trophies are for shelves. This boat is for skiing. Win your own. You now your favorite championship team - your family - behind you.

RESPONSE LX

RESPONSE LX

WOW saat membari Jill Knicker—Malibu owner

"Tight, responsive and powerful, the Malibu Response LX delivers exactly the driving and towing experience knowledgeable skiers demand." — *WaterSki Magazine*

Whether you are an advanced slalom specialist or a beginner, the Response LX will make you feel like a champion. The first open bow ever to tow the

Zero Friction UFLEX cables for throttle and shifter systems provide the smoothest possible response and complete driver control. The exclusive, 5" servo-driven gauges by

## The first open bow boat to tow the U.S. Open.

U.S. Open Waterski and Wakeboard Championships. It is the official towboat of the U.S. Waterski Nationals, U.S. Showski Nationals, U.S. Waterski Team and the World Famous Tommy Bartlett Waterski Show. But you don't have to ski on a team to get the most out of this luxurious performance boat. For 1999, the Response LX has an even more spacious interior and the same, precision designed SV23 Diamond hull as last year. Practical, yet deliciously luxuriant, drivers who aspire to perfection will be gratified when they put it through tight cornering exercises. The

Kysor Medallion offer greater visibility and higher accuracy through the full range than any gauge ever introduced to the marine industry. The Response LX has established new standards in the ski boat industry for performance, comfort and storage. This boat doesn't just define its class, it owns it.

RESPONSE

## RESPONSE

A contemporary classic. A sleek, new wraparound windshield jazzes up this ski dynamo for 1999. This is style with substance, elegant design coupled with top performance in a combination that all skiers will appreciate. Forty percent additional ski storage makes room for more fun, while a padded sundeck enhances the possibilities for relaxation.

RESPONSE

RESPONSE

12

RESPONSE

"The epitome of the tournament ski boat, the Response maneuvered better than anything else we tested and had a respectable top speed near 50mph." — *Powerboat Magazine*

Pro tour competitor Jesus Paredes - Malibu name

A perennial favorite among skiing enthusiasts, the Malibu design team has tweaked the 1999 Response to perfection. A new, heavy-duty glove box self-opens with the assistance of a gas-assisted shock. A 40-quart ice chest has been conveniently located in front of the observer seat. Last year's industry-first servo-

driven gauges have been replaced with larger, 5" servo-driven gauges for even greater visibility and accuracy – a feature that leaves the rest of the

industry playing catch up to Malibu's innovation once again. The new, padded sundeck adds the feel of a larger boat without sacrificing performance. And the same SV23 Diamond hull that Malibu introduced last year insures that the 1999 Response series has the same outstanding ride for slalom skiers. Employing the most advanced computer technology for design, Malibu

## The best just got a little better.

engineers have fine tuned the Diamond hull for maximum efficiency, resulting in lower wakes, better fuel economy, a softer ride and more responsive handling.

World Record Holder Tawn Larreal/Hullin – Malibu owner

SUNSETTER LX

## SUNSETTER LX

A blissful end to a summer weekend. That's what the Sunsetter LX means to many families. This spacious inboard ski boat defies the stereotype because it offers roomy accommodation for the entire family, yet delivers true AWSA tournament performance. Three full-sized ski lockers plus gunnel dry storage allow you to pack for the day and savor the last rays of a fun-packed summer day on the water.

malibu

SUNSETTER LX

"One of the few open bows that combines the low slalom wakes and minimal spray of smaller closed bows." - *WaterSki Magazine*

With more storage space than inboards of comparable size, the Sunsetter LX is ideal for families seeking a performance ski boat. Three full-sized ski and

even the youngest family members. The higher, drier ride and rack and pinion steering will make Dad-duty a joy during those long days on the water. Driving is

## Tournament performance, family fun.

boat's everlasting popularity as America's number one family open bow. Gas-assisted shocks for easier access make the generous ski and wakeboard locker behind the rear seat convenient and accessible for

wakeboard compartments, a built-in ice chest and new, 5" Kysor Medallion servo-driven gauges contribute to this

a pleasure for whomever is in charge. From wakeboarding to tubing to traditional slalom skiing, the Sunsetter LX provides a pull with power and agility. The official towboat of the Women of Watersports Wakeboard event, this boat is made to handle heavy duty use. So round up your family and put it through its paces. There's no better way for a family to enjoy the summer.

WAKESETTER

## WAKESETTER

Capturing the spirit of youthful mettle, the Wakesetter is the highest performing wakeboard boat available. The Wedge gives it the edge. Malibu's unique hydrofoil system enables wakeboarders of all skill levels to create the perfect wakes to push their limits when they are ready. Radical youth or conservative elders, this boat accommodates them all.

WAKESITTER

World Champion Mikal Wiedergren - Volvo swimmer

20

WAKESSETTER

"By combining the Wedge with additional weight, our team created what they considered the best boarding wakes of the test. 'It's huge, the ultimate jumbo,' our riders raved." — *WaterSki Magazine*

Tour stop winner Brennan Johnson - Malibu owner.  
Optional Tuna Tower available through ECI Products.

Lower the Wedge and your Wakesetter will offer huge wakes for intermediate to pro level wakeboarders. Raise the Wedge and get perfectly shaped wakes for beginning to intermediate level riders. No bothersome ballast tanks to fill or drain, no additional weight necessary. Wakeboarding, with its need for larger wakes, has made the sport a group

activity again. With two moveable, custom "launch" seats which provide additional seating, the Wakesetter makes it possible to take all your friends for a ride. An oversized, 50" black anodized swivel head ski pylon for higher, safer flights makes getting air a given. The Wakesetter has more useable board storage than any other wakeboard boat, stowing away up to 10 wakeboards at a time. And, since the Wakesetter provides the wake without the weight, it is not necessary to exceed passenger weight capacities. The only wakeboard boat equipped with 5" servo-driven gauges, drivers will appreciate

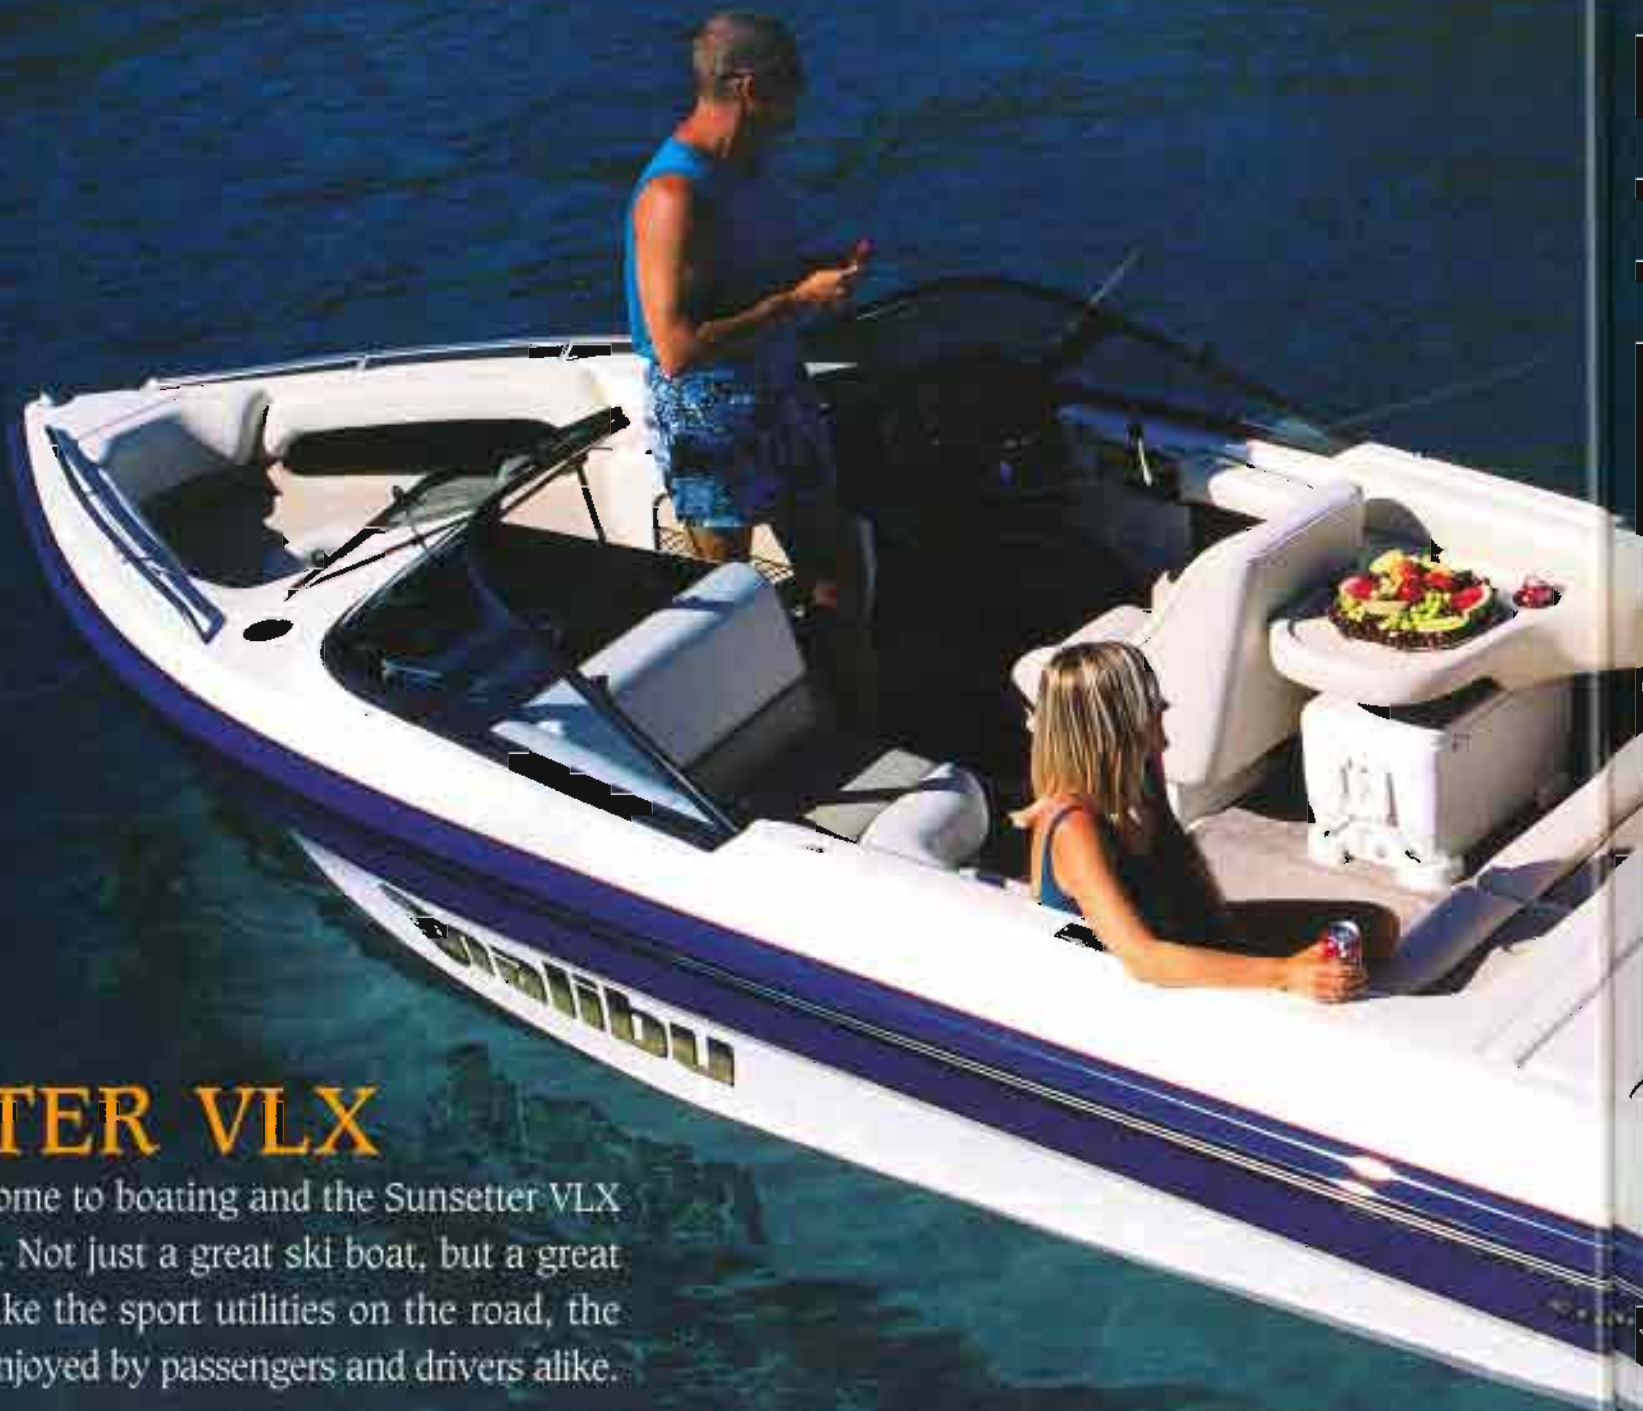

## What are you doing for the next ten summers.

the enhanced visibility and accuracy. Endorsed by World Champion wakeboarders Mike Weddington and Andrea Gayton and tour stop winner Brannon Johnson, this boat has been flight tested by the very best.

## SUNSETTER VLX

The Sport Utility has come to boating and the Sunsetter VLX is the head of its class. Not just a great ski boat, but a great boat . . . period. Just like the sport utilities on the road, the Sunsetter VLX will be enjoyed by passengers and drivers alike.

23

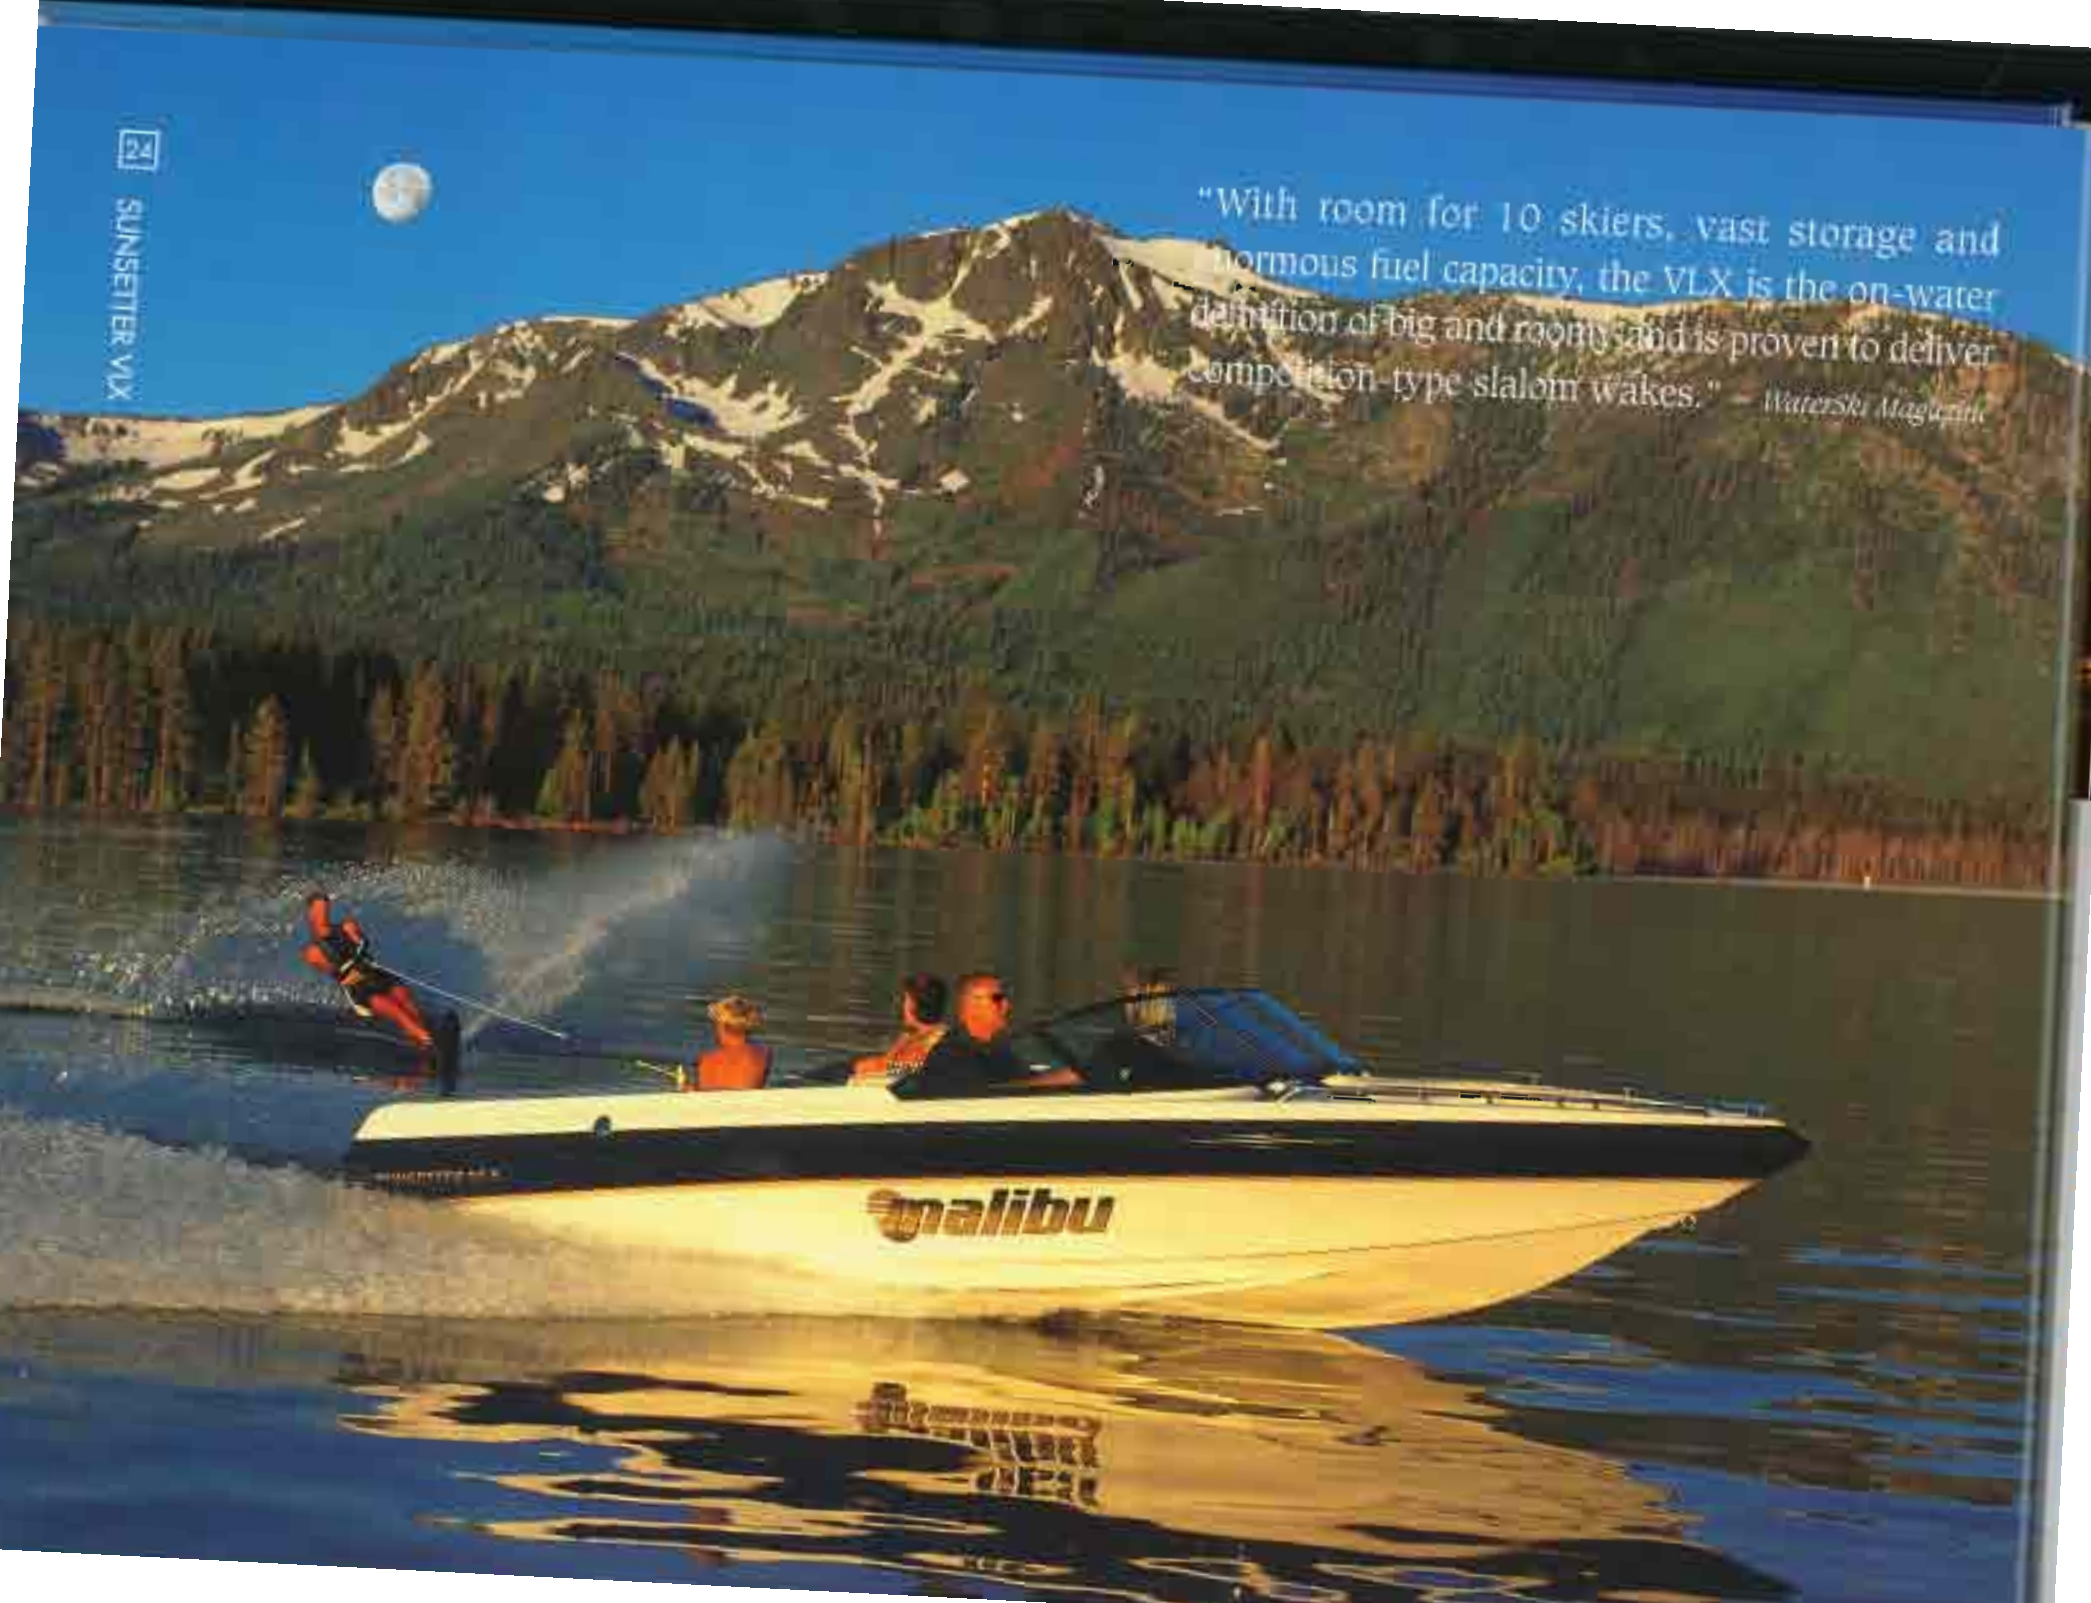

SUNSETTER VLX

24

SUNSETTER VLX

"With room for 10 skiers, vast storage and enormous fuel capacity, the VLX is the on-water definition of big and roomy, and is proven to deliver competition-type slalom wakes." — *Waterski Magazine*

With 325 horsepower, the Sunsetter VLX has the most standard power in its class. Power hungry drivers will be readily satisfied, as will passengers

the largest, but the most precise. This is because Malibu engineers designed this luxury boat first and foremost as a great ski boat, built on the

## The ultimate in off-road vehicles.

who can sit back and savor the luxury of its premium grade vinyl seats. Air lumbar support for the driver makes the possibility of a long excursion comfortable, while a refreshment console makes it attractive. The most storage, comfort and overall performance of any Sport-V class on the market, the Sunsetter VLX isn't

remarkable SV23 hull. The SV23 was the first hull to provide world class slalom wakes and an extremely smooth ride in less than ideal conditions. The same rack and pinion steering, high visibility 5" servo-driven gauges and Zero Friction U-Flex throttle and shifter cables that make all Malibus a joy to drive are integral to this luxury sport boat as well.

remarkable SV23 hull. The SV23 was the first hull to provide world class slalom wakes and an extremely smooth ride in less than ideal conditions. The same rack and pinion steering, high visibility 5" servo-driven gauges and Zero Friction U-Flex throttle and shifter cables that make all Malibus a joy to drive are integral to this luxury sport boat as well.

The cheetah is the fastest land animal in the world, reaching speeds up to 70 mph from a standing start in less than 30 seconds. It uses its powerful muscles to achieve a perfectly honed movement in a heartbeat. It is the embodiment of power and grace on land. Malibu offers the most durable and powerful engines on the water. Like the cheetah, they respond as if to your thoughts. Malibu engineers have cooperatively been involved with the design, calibration and testing of every engine that is bolted to a

running muscles to the embodiment of and powerful if to your thoughts, with the design, Malibu boat, ensuring

## Our owner's manual uses techni

you the finest performance available. You have read the performance tests and you know the track record of the aptly powerful Monsoon 325 MPL. It has been the powerplant of three of the last four Ski Boat of the Year awards and has prompted industry experts like *Powerboat Magazine* to exclaim, "Powered

by Malibu's 325 horsepower Monsoon, the Response rocketed out of the hole like no other boat could at our performance trials." The Monsoon features the Vortec Gen+ cylinder heads and a high performance roller cam that generates an incredible 325 horsepower. Indmar's advanced electronics feature a

## cal terms like “a bat out of hell.”

waterproof ECM with the latest calibration software. It is the heart of Indmar's 3-dimensional, total engine management system. Its durability is backed by a 3-year warranty that includes fuel and electrical systems. And like the cheetah, it purrs. But truly exceptional performance goes beyond sheer horsepower. Malibu engineers have utilized the very latest computer technology to perfectly blend Monsoon power with the SV23 hull design to achieve softer wakes, better fuel efficiency and higher top end speed. After all, with that kind of power, you need the body to sustain it.

< To a Malibu gelcoater, it is not simply color that is channeled through a spray gun. It is an essential element of a boat's unique character that should stir the spirit of its owner. Tape lines are applied by hand while hundreds of different color combinations are used to create the most beautiful and durable boats on the water. This exacting, 10-step, in-the-mold gelcoat process produces a remarkable finish.

> Lee Wells, Malibu's Chief Interior Designer, brings 50 years of award winning experience to Malibu's Research and Development Center. He is highly acclaimed throughout the marine and entertainment industries and his new Malibu interiors demonstrate why. They are beautifully sculpted, brilliantly functional and rich in tactile pleasures. His design and execution of Elvis Presley's "Solid Gold Cadillac," on display at the Country Music Hall of Fame Museum, is just one example of his myriad of accomplishments.

> Every new Malibu undergoes an exhaustive series of rigorous tests on our factory test lake to ensure peak performance before it is shipped. From steering wheel alignments to instrument calibrations, our lake test crew is committed to assuring that whatever goes into your boat meets Malibu's demanding, highest quality standards. We make sure your boat is in tip top shape before you take it through its paces.

Our rigging department builds boats using one guiding principle: true quality dwells in the details. Hoses are double-stamped, bilges are perfectly gelcoated and finished, dashes and electronic components are checked and re-checked. Only the best materials are used, where components are visible and not. For instance, Malibu uses "Zero-friction" U-Flex cables for all throttle and shifter systems to provide the smoothest possible throttle response and control. Rack and pinion steering systems add to the boat's stable driving demeanor. No wonder *Powerboat Magazine* inspectors were so impressed that they enthused: "No one rigs or finishes a boat better."

Our engineers have dominated every major ski boat test they've contested. But they are not just

interested in dominating the watersports

industry, they want to redefine it. So, when Malibu engineers were challenged to improve upon their acclaimed 1998 "Ski Boat of the Year" performance, they started with

## Breaking new ground.

everything they had learned about comfort, agility, power and design. Then they projected into the future and let their imaginations find a way

to improve upon perfection. The result is the most innovative Malibu line-up ever.

The world's first digital instruments with analog displays were first introduced in a Malibu. They have been called the best recreational instruments ever made. . . and with good reason. Their bold new design takes advantage of digital technology, greater reliability and accuracy. The larger, illuminated 5" gauges make for effortless viewing of critical data, day or night. There are two inputs into one speedo for the finest in accuracy and most dependable readings under tournament conditions. Rack & Pinion steering and Zero Friction shifter and throttle cable systems are used for the ultimate driving experience. Switches are illuminated for easier viewing at night.

Always use proper tie-down technique. Always use proper tie-down technique. Always use proper tie-down technique.

In keeping with our status of technology leadership, the Malibu line-up is equipped with some of the most advanced engineering ever witnessed in the marine industry. Malibu's Fiberglass Engine Chassis System (FibECS) is unique to the industry and has been awarded a patent by the U.S. patent office. With four engine mount pads hand laminated to over a half inch thick, the durability is unquestioned. What is more impressive is FibECS function. Since the engine mounts are through-bolted, and the load is dispersed over eight attachment points instead

## Making new rules in the art of engineering.

of four, drive train noise and vibration have been reduced significantly. Malibu's "compositech" fiberglass floor system is one piece and wood free, therefore it is durable and of course, "rot free." There are no seat base screws to loosen because every seat base is carefully molded in as part of the floor. Incorporated into our engine chassis system is a box called the Hydrophonic Sound Dampening System. Located directly over the strut, this box is open to the lake water below, which allows it to fill and add mass to the surrounding strut. By adding mass and stiffness to this area we are able to absorb energy generated by prop thrust vibration, creating comfortable, vibration-free boats.

A photograph of a family of four—a man, a woman, and two young children—standing in front of a large, white Malibu boat with blue accents. The man is on the left, wearing a light-colored polo shirt and shorts. The woman is on the right, wearing a yellow sleeveless top. The two children, a girl and a boy, are in the front. They are all smiling. The boat behind them is a Malibu speedboat, showing the cockpit area with a steering wheel and various controls. The background is a bright, sunny outdoor setting, possibly a boat show or a marina.

Malibu boats consistently rank at the top of distinguished nationwide surveys measuring reliability, durability and customer satisfaction, both at purchase and after years of ownership. Ownership experience is as much a concern as the high-quality engineering and craftsmanship that goes into all of our boats. Our Transferable Lifetime Warranty reflects the uncompromising integrity of our components, materials and quality control standards. Malibu dealer service personnel are trained in maintaining the advanced systems of your boat. A custom Malibu Insurance Program offers customers the lowest possible insurance rates. Club Malibu provides owners new ways to enjoy their Malibus. Malibu Review is sent quarterly to all Malibu owners and includes interesting articles on great maintenance tips and Team Malibu athletes.

We believe it's impossible to feel truly comfortable unless you and your family feel safe and secure. That's why our engineers have expended so much effort on safety engineering in your new Malibu. From the perfectly placed hand rails, to the swivel head pylon that rotates on precision bearings, to the little yellow tag bearing the  safety seal of approval, you can rest assured of the quality of the safety features inside and out of your new Malibu. After all, on the outside, most boats look pretty similar – sporting shiny hulls, bright colors and fancy

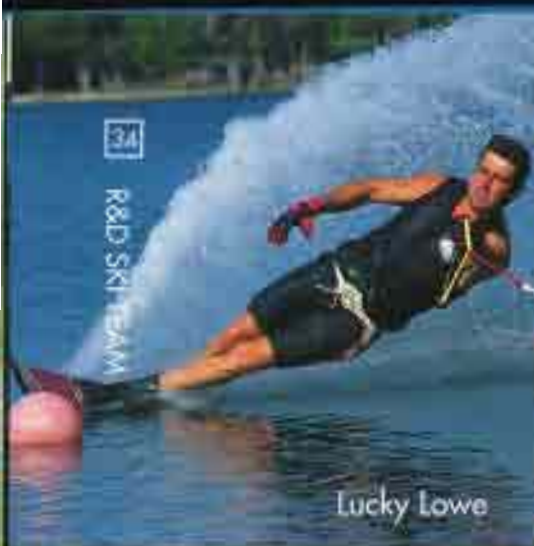

upholstery. But it's hard to get a good look at the critical components inside, like the

## Enjoy more than the world's finest ski boat.

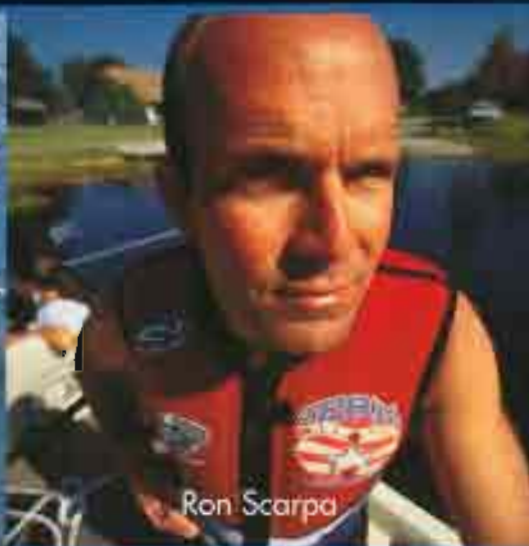

fuel system, steering and flotation. We don't believe the minimum requirements established by the Coast Guard are good enough. That is why we participate in the Safety Certification Program administered by the NMMA. It's our job to make sure your new Malibu is a reassuringly safe choice. We know that you will be carrying precious cargo inside. That's why we demand safety standards that exceed your expectations. We would not have it any other way.

## We give them everything we've got.

Why does Malibu sponsor a research ski team? It's simple, really. We are pushing the limits of technology to improve our product, and today's champions are trying innovative techniques that push the limits of watersports. Their feedback is invaluable to us. Malibu keeps a firm grip on the sports' rapid advancement through this elite research team of world class professional athletes in every discipline.

The team skis Malibu boats around the world and provides indispensable feedback that we use to keep our boats the best in the world. Malibu is the official towboat of the U.S. National Championship series of events, U.S. Open, U.S. Barefoot Open, U.S. Waterski Team, Women of Watersports Pro Tour, International Novice Tour and the world famous Tommy Bartlett Waterski show.

## Strength, beauty, class.

They are graceful, strong and beautiful. And they are serious athletes. From two-time tour winner Jill Knutson and National Champion Lori Krueger to World Champions Tawn Larsen-Hahn, Sherri Slone and Andrea Gayton,

Team Malibu has established itself as the WOW team to beat for 1998. We believe these women deserve to be seen and Malibu is proud to be a sponsor of WOW On Tour, ensuring that women will always have a place to compete.

36 SPORTSTER LX

US Coast Guard 1000 lbs. Capacity

## SPORTSTER LX

No other manufacturer offers a premium boat at entry level prices. That's why the Sportster LX is head and shoulders above the competition. At Malibu, we don't cut corners by recycling tired, old designs. We believe entry level boat buyers deserve the same excellence in design and appointments as buyers of more expensive boats, and our Sportster LX demonstrates this commitment to excellence.

37

SPORTSTER LX

It's only price that can classify the Sportster series as entry level ski boats. Built to the same exacting standards that have garnered Malibu seven Ski Boat of the Year awards from industry experts, you'll be hard pressed to find a better ski boat for the money. The performance of the Sportster LX is not only comparable to other manufacturers' premium priced boats, but actually outperformed them all at last year's *WaterSki Magazine* boat tests. The Sportsters accelerated faster, tracked better, skied better and outran the competition in every

it's on the wake of the Response as the best performing ski boat on the market. Every Sportster is equipped with the Malibu Transferable Lifetime Limited Warranty. If you love to ski and are anxious to get into a dynamite tow boat at an entry

**This is the way to leave it all behind.**

top speed test. With the 1999 improvements, such as 3.5" Kysor Medallion servo-driven gauges, this boat is not only the best value in the industry,

level price, Malibu's Sportster series makes it clear, there is only one real choice. Go ahead, get your feet wet with a Sportster LX. Your family will love you for it.

SPORTSTER

## SPORTSTER

Other ski boats in this price range simply do not perform to the standards of the Malibu Sportster. This closed bow, entry level ski boat is well suited to the first time buyer who wants outstanding performance. When you look at other boats in this entry level class you'll find outdated designs, sparse features and old tooling. This is a case where comparison shopping pays off handsomely, in a better ride and more fun on the water.

"Our test team discovered while putting this boat through its paces, a Sportster owner won't have to settle for second place in quality, performance or towing aptitude." — *WaterSki Magazine*

The closed bow version of Malibu's Sportster series offers dedicated skiers the opportunity to enjoy the specialized ride of an inboard ski boat

and the boat is founded on an all fiberglass foundation. No wood. No rot. You'll find the same, standard, rack and pinion steering and Zero Friction U-Flex cables

## For those who just have to have it all.

without sacrificing the quality of a higher priced model. Malibu engineers take pride in all their products, and they know that the entry level buyer is as important, if not more important, than purchasers of higher priced models. That's why they insist on the same, contemporary systems for design and manufacturing of the Sportster series as for the rest of the Malibu line. Every Sportster is standard with technological innovations such as FibECs, the only engine chassis system with a U.S. Patent. The bilge is finished, the pylon swivels

for the ultimate driving experience that are used in our other models. A 310 Vortec engine boasts the most standard horsepower in its class, and the standard, 38 gallon fuel tank is the largest in its class as well. Malibu craftsmanship is evident in the details. We build boats to last.

FLIGHTCRAFT

## FLIGHTCRAFT

Barefooters are a rare breed. When it comes to tow boats, they have special needs. Only one boat meets the demands of these nimble athletes who dance upon the water. It is the Flightcraft by Malibu and you will see it wherever you see the very best barefooters. If you qualify, come dance with the best behind a Flightcraft.

"In the world of high-end competitive barefooting, the Flightcraft is as good as it gets." — *WaterSki Magazine*

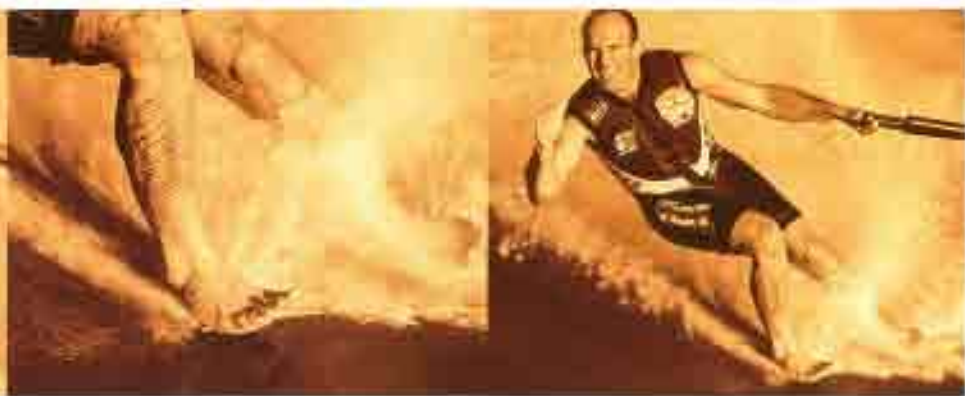

A world class boat for world class athletes, the Flightcraft is the only boat for the very best competitive barefoot

skiers. World Record holder Ron Scarpa skis behind a Flightcraft. In this specialized sport, that's almost all that needs to be said. Scarpa has been at the top of this sport for years, and he shows no signs of own family now, and he appreciates the need for a boat that accommodates everyone. That's why Flightcraft remains his tow boat of choice. With the nimbleness of a fine-tuned race car, the storage and roominess of an outboard configuration, and the smooth ride of the deeper V hull, the Flightcraft is ideal for barefooters who want to share the fun, improve their skills, and include the family

## Not for the timid.
