THE ART OF PERFORMANCE

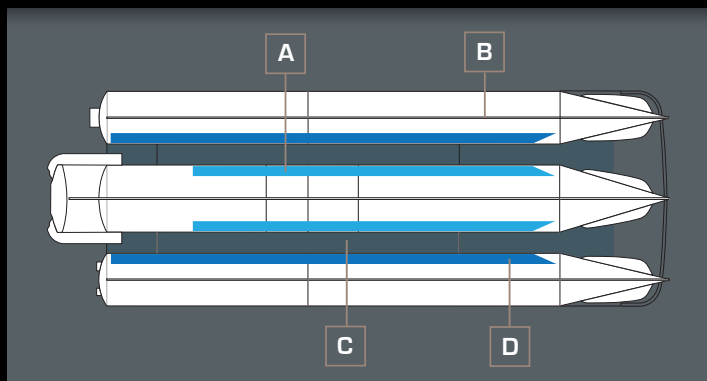

Enjoy the ultimate boating experience with Bennington's Elliptical Sport Package – Luxury, Comfort and High Performance at your fingertips.

Our engineers developed the patented ESP hull to take pontoon boating to the next level; we think you'll be more than satisfied with their efforts. ESP offers enhanced stability and water displacement with quick planing and handling characteristics that rival a fiber-glass boat. Designed for high horsepower applications, ESP includes:

- A Patented 32" Elliptical Center Pontoon with Lifting Strakes
- 25" Diameter Outer Pontoons with Performance Foils
- Under Deck Wave Shield

See page 53 for additional performance options.

- A. Lifting Strakes
- B. Full-length Solid Round Keels
- C. Under Deck Wave Shield
- D. Performance Foils

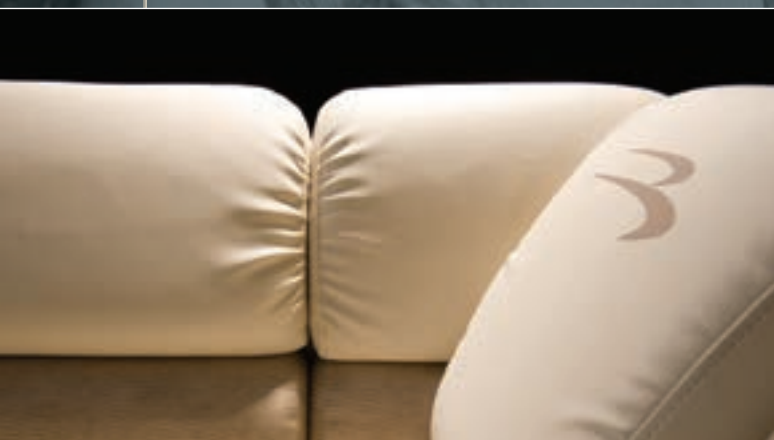

Scan this code with your smartphone to watch the ESP Performance video.

**Power-Assist Steering and Fuel Tank upgrade are required for maximum performance. Both options are strongly recommended for engines greater than 150hp.*

Q SERIES

The Q Series is top of its class in luxury boating; featuring the most standard equipment and fine detail Bennington has to offer. There are several models to choose from in our most popular floor plans. Cruise in exceptional style with Bennington's Q.

2575 QCW I/O

2550 QBR

2550 QCL

ADDITIONAL PERFORMANCE OPTIONS

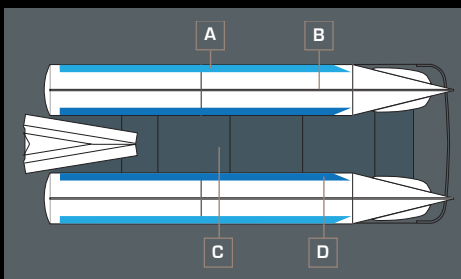

SPS: SPORT PERFORMANCE SYSTEM

The SPS hull offers handling and performance characteristics similar to ESP in an affordable package designed for engines 150 hp and less. SPS includes 3 full-length 25" diameter pontoons, lifting strakes on the center pontoon, performance foils inside the outer pontoons, solid round keels on all three tubes, an under deck wave shield and a 32-gallon transom fuel tank on select models. SeaStar® hydraulic steering option is recommended for engines greater than 115 hp.

EXPRESS TUBE PACKAGE

The Express Tube Package offers increased bow lift and moderately increased speed and maneuverability as an affordable alternative to a full-fledged performance package. Included in the package is a modified center tube with lifting strakes, V-Keels on all three tubes and a modified wave shield. Add SeaStar® hydraulic steering for engines greater than 115 hp (25" tubes required).

TWIN 32" ELLIPTICAL PERFORMANCE PACKAGE

Our patented Elliptical Pontoons combined with lifting strakes, performance foils, solid round keels and an under deck wave shield offer incredible two-tube performance. Each elliptical pontoon adds over 1,000 lbs. of additional buoyancy, allowing the boat to sit higher and run faster. The width of the elliptical pontoons also increases deck stability fore & aft as well as side to side. Available as a Freshwater or Saltwater package. Saltwater package includes Saltwater anodes and sealed lifting strakes/performance foils.

- A. Lifting Strakes
- B. Full-length V-Keels (Express Package) Full-length Solid Round Keels (SPS/Twin Elliptical)
- C. Under Deck Wave Shield
- D. Performance Foils

UNDER DECK WAVE SHIELD

Deflects water from the bottom of the deck, which reduces "surging" and enhances the soft, quiet ride in rough water.

LIFTING STRAKES

Add bow lift, which increases handling across choppy water and improves speed as much as 5 miles per hour, depending on engine selection. For optimum performance, lifting strakes are recommended only for engines rated 115 hp or greater and for boats exceeding 30 mph. Lifting strakes are recommended for Twin Elliptical Pontoons with 90 hp or greater.

SEASTAR® HYDRAULIC STEERING

Eases steering effort with higher horsepower engines. Expect two-handed handling in hard turns. Recommended for engines rated 115 hp or greater.

POWER-ASSIST HYDRAULIC STEERING

Power-Assist Steering is powered by an electronically controlled hydraulic pump connected to the SeaStar® system. The electric pump "does the work for you" so the driver can expect incredible handling and turning with little effort. Recommended for engines rated 150 hp or greater.

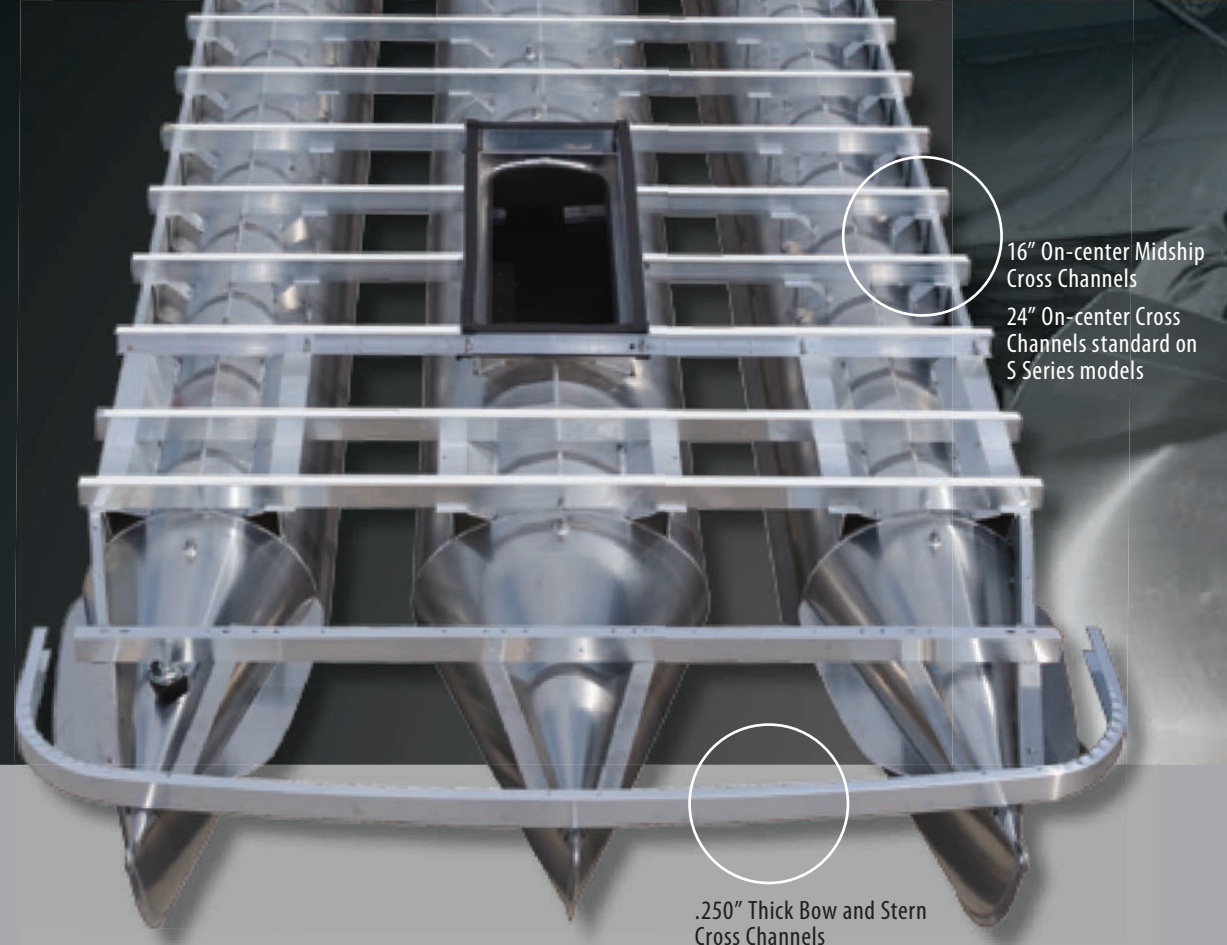

BENNINGTON BUILT

Take the time to look under and around any Bennington boat. The quality and attention to detail is unsurpassed. We use only proven construction techniques and the highest quality materials. Since we take no construction short-cuts, Bennington pontoons will be the most solid, quiet riding boats on the water and they are backed by the best warranty in the industry. If you take the time to compare...your choice will be Bennington.

Anti-Vibration Process

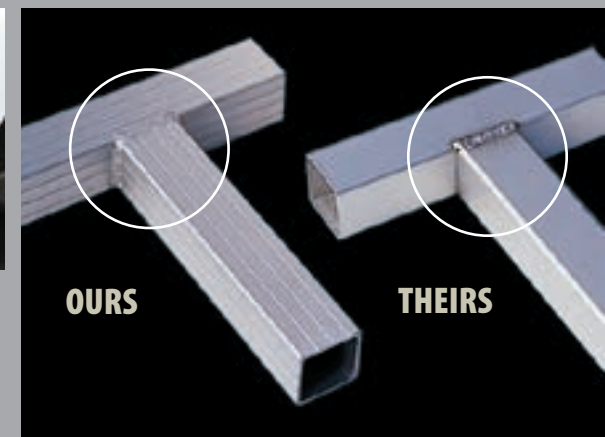

- Insulated resilient strip applied between all panels and rails
- Insulated resilient strip applied between cross members and decking
- Rails, Furniture & Console through-bolted to cross members

Cross Channels: Our channels are twice as thick as those used by many of our competitors. Bennington's taller 3" channel provides more vertical strength than the typical 2" channel. The heavy-duty cross channels combined with our extruded M-deck brackets and Fanged Elevator bolted deck construction minimizes deck twisting ensuring your Bennington will provide the most solid, quiet pontoon ride in the industry. 3" tall, .250" thick cross channels standard in bow and stern locations. 3" tall, .125" thick cross channels standard in mid ship locations.

Full-length Keels: Full length keels protect the tubes in shallow water and improve tracking while underway. Optional solid keels are recommended for use in salt water.

4-Sided Anodized Welding: 1.25" Rails are serrated for strength and good looks, welded on 4 sides (not 2) and anodized after welding for a superior finish.

M-Deck Brackets: Extruded (.125") deck brackets are thicker and stronger than thin sheet aluminum brackets. Our stern deck brackets have **4 points of contact**, distributing weight evenly over the end cap, the strongest part of the tube. We space our deck brackets wider and lower than our competitors, greatly reducing the amount of twisting and racking the deck can experience while in rough water.

Reinforced Bow Radius Channels: Bow decks and corners are reinforced with a .250" radius bow channel that supports the heavy-gauge anodized aluminum bow trim. Stronger than bow corner castings, they are less susceptible to damage.

All under-deck wiring is encased in conduit

Our ergonomic design approach offers the industry's most sophisticated seating. All Bennington seating features exclusive **Icon™ Soft-Touch Upholstery**. The Infinity Topcoat is engineered for ultimate UV stability, easy cleaning, resistance to abrasions, mildew and stains. A Satin texture weave backing allows for smooth, tailored, instant-recovery upholstery with no puckering, or bagging. The unique high density foam used in five compressions provides the perfect combination of support and plush comfort.

Quick Release Bimini: Tops raise and lower in seconds with our patented quick-release fittings designed to eliminate all rattles.

Rattle-free Rails: Rail panels have a resilient sealing strip to ensure a quiet, rattle-free ride.

Heavy Duty Stainless Fittings: Cleats and stern corners are made of stainless steel, providing 3 times the strength of aluminum castings. They won't pit, corrode or discolor.

Rail Spacers: .25" rail spacers are placed between the deck and rail allowing easy deck drainage and ventilation to reduce mold and mildew.

Deutsch Connectors & Wiring: All wiring harnesses feature marine grade, waterproof connectors.

CONSTRUCTION COMPARISON

Bennington offers more exclusive features than the competition.

Bennington Standard:	Competitor

FLOOR PLAN STYLES

Here's a great way to navigate the Bennington line... select the trim level you are looking for and combine it with the floor plan style that suits your boating needs. Each series is designated with an exclusive trim level, beginning with our top of the line Q, followed by R, G and S. Floor plan styles originate with seating and are complimented with amenities based on each series. Below is an explanation of Bennington floor plan styles to help you select the layout that's right for you:

Traditional Stern Lounge: features two aft-facing stern lounges with a center walk-thru aisle on the Q, R and G Series. The S Series stern lounge is a unique double lounge positioned to the port side of the boat. The stern lounge concept was delivered to the pontoon world by Bennington and has revolutionized pontoon seating for all.

Stern Lounge Sport Tower: features two aft-facing deluxe stern lounges and a versatile Sport Tower with Wet Sounds™ Speakers. Together these two features create an eye-catching, sophisticated style statement. The tower can be used for water sports and the sound system is top-notch.

Stern Lounge Sport Arch: features two aft-facing deluxe stern lounges and a versatile Sport Arch that can be used for watersports. With the bimini closed, this arch offers a sporty look while enhancing the dock appeal of your boat.

Entertainment Bar: features abundant counter space with comfortable seating. Made to turn your boat into a summer patio for entertaining friends and family.

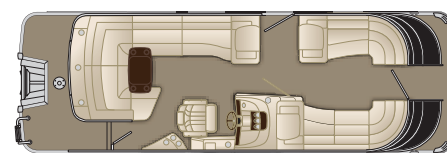

Club: features "Club Lounge" seating at the stern. The removable teak table can be replaced with fill-in cushions to create a spacious bed for sun lounging, napping or riding in pure-comfort. It even provides a nice play pen for the little ones.

Fishing: features amenities such as bass seats, live wells and rod holders with accommodating deck space to make family fishing comfortable for everyone.

Stern Radius: features chaise lounge bench seating both fore and aft. A versatile solution for those who enjoy the concept of stern lounging.

Cruise: our traditional pontoon layout with modern style and options such as our port table group to make pontoon cruising ideal.

SAFETY FIRST

Bennington provides hinge protectors as standard equipment on all Bennington gate hinges and ladder hinges. If you damage a hinge protector on any model year Bennington, we will provide replacement parts at no charge to you. Contact your local Bennington dealer for assistance.

BENNINGTON WARRANTY

Bennington takes pride in having the industry's highest standards and has been honored with more quality and satisfaction awards than any pontoon maker in the business. Awarded with the NMMA's Excellence in Customer Satisfaction 11 years in a row, our goal is to continuously improve our customer experience and provide boats that offer a lifetime of enjoyment. The CSI Award recognizes manufacturers who receive an exceptional satisfaction score for overall boat, engine and dealer experience.

BOW-TO-STERN WARRANTY

As a Bennington owner, the first five years are on us.* All materials and workmanship on your Bennington are covered – including carpet, upholstery and electronics. No hassles, no worries. The engine is covered by the engine manufacturer's warranty.

LIMITED LIFETIME DECK WARRANTY

As a Bennington owner, you receive a Limited Lifetime Warranty on the 7-ply, pressure-treated, marine grade wooden deck. Since we fasten the rails and deck directly through the under structure, Bennington decks flex less and will provide you with a lifetime of enjoyment.

LIMITED LIFETIME STRUCTURAL WARRANTY

As a Bennington owner, you receive a Limited Lifetime Warranty on the structure, pontoons, gates, channels, motor mount and seat frames. If anything goes wrong, we'll fix it. Season after season, your Bennington will be ready.

TRANSFERABLE WARRANTY

Bennington warranties are transferable at no charge to Club Bennington members through your local Bennington dealer adding to the resale value of your boat. The warranty period begins on the original owner's new boat purchase date. If the boat is sold during its warranty period, the same warranty coverage will carry over to the new owner, qualifying as a Club Bennington member.

NO HAND-OFF TO OUR SUPPLIERS

Bennington doesn't hand off warranty responsibilities to our suppliers. When it comes to warranty claims, your Bennington dealer will take care of it directly with Bennington. After all, no one cares more about your satisfaction than we do.

NO PRO-RATING

Bennington boats carry the same valuable warranty whether it's the first day or the last day of the warranty period. We do not use a declining scale of value in our warranty, also known as pro-rating.

PARTNERSHIP WITH OUR DEALERS

Bennington dealers receive 100% of the retail shop labor rate for warranty repairs. This ensures that your warranty work is a priority and completed quickly with your satisfaction in mind.

**Extend your 2013 Bennington 5 Year Warranty to a 7 Year Warranty by joining Club Bennington. Additional 2 Year Warranty is non-transferable.*

JOIN THE CLUB!

Expand your Bennington lifestyle by joining our online community of boating enthusiasts. You'll receive all the perks we extend to our Club Members such as a **7 Year Bow-to-Stern Warranty***, VIP Access to Product Sneak Peaks, access to our Owner's Forum, Member-Only discounts and more. As the Club grows, our goal is to bring the Bennington boating community together through social and charitable actions that enable us to share our love of boating and living life to the fullest.

Visit clubbennington.com or scan this code with your smart phone to easily register for Club Bennington today!

*You'll receive your 7-Year Warranty Code when you sign up for the Club. Bennington's 7-Year Bow-to-Stern Warranty is for Club Bennington members only. Offer good on any 2013 Bennington.
