Fast

Feel the exhilaration of increased speed and handling with Bennington's performance running surfaces.

Enjoy the ride.

PERFORMANCE UPGRADES

UNDER DECK WAVE SHIELD

Deflects water from the bottom of the deck, which reduces "surging" and enhances the soft, quiet ride in rough water.

LIFTING STRAKES

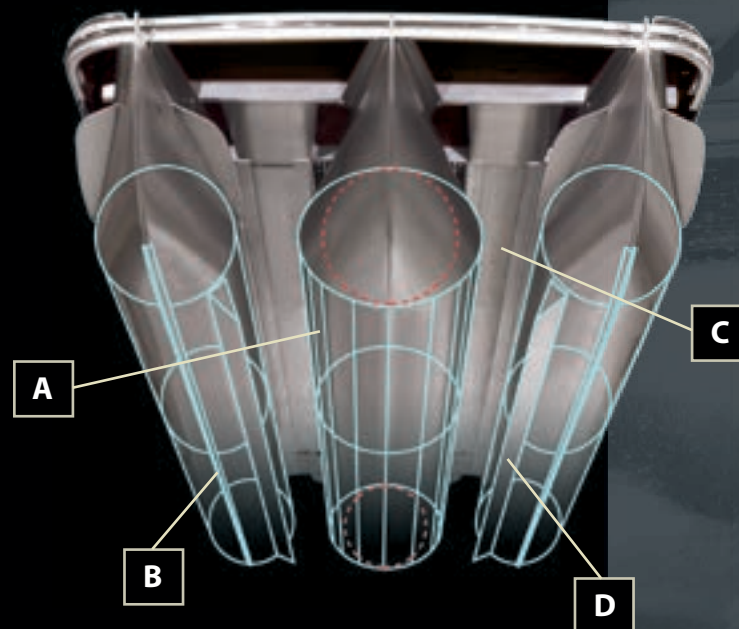

Add bow lift, which increases handling across choppy water and improves speed as much as 4.8 miles per hour, depending on engine selection. For optimum performance, lifting strakes are recommended for engines rated 115 hp or greater and for boats exceeding 30 mph. Lifting strakes are recommended for 90 hp or greater on boats with twin elliptical pontoons.

SEASTAR[®] HYDRAULIC STEERING

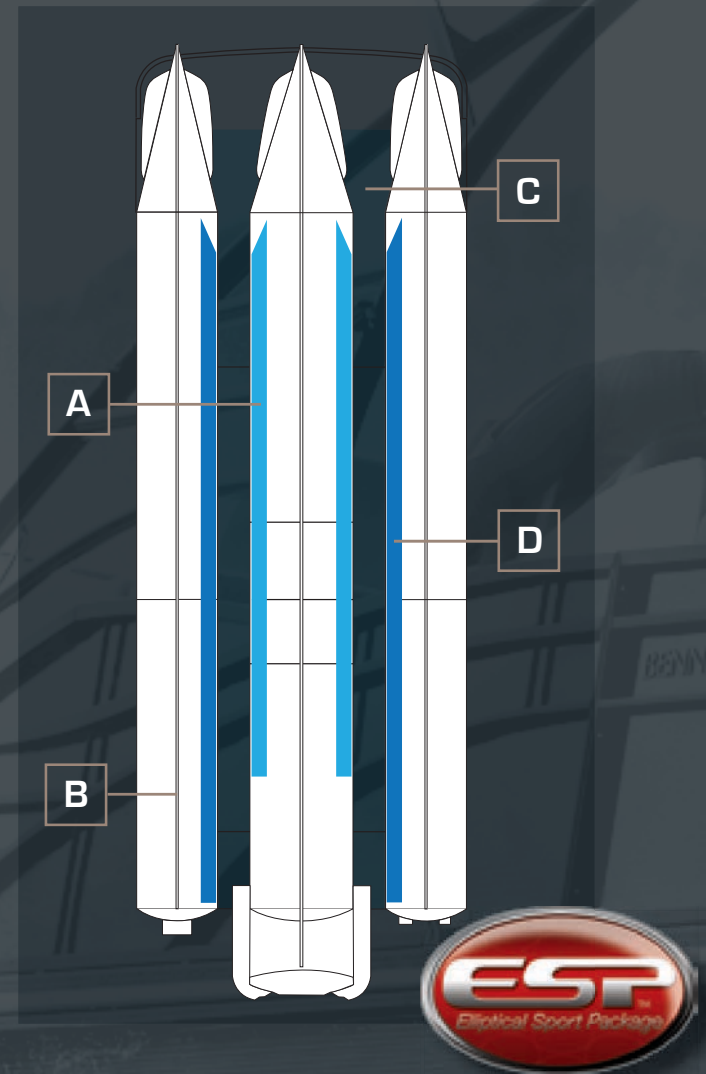

Eases steering effort with higher horsepower engines. Expect two-handed handling in hard turns. Recommended for engines rated 115 or greater.

POWER-ASSIST HYDRAULIC STEERING

Power-Assist Steering is powered by an electronically controlled hydraulic pump connected to the SeaStar[®] system. The electric pump "does the work for you" so the driver can expect incredible handling and turning with little effort. Recommended for engines rated 150 or greater.

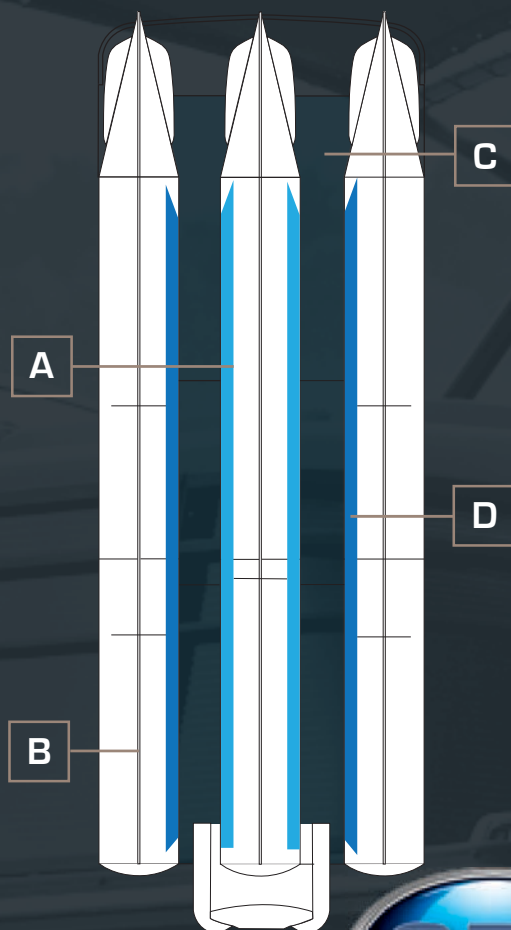

- A. Lifting Strakes
- B. Full-length V-Keels (Express Tube Package) Full-length solid round keels (ESP/SPS/Twin Elliptical)
- C. Under Deck Wave Shield
- D. Performance Foils

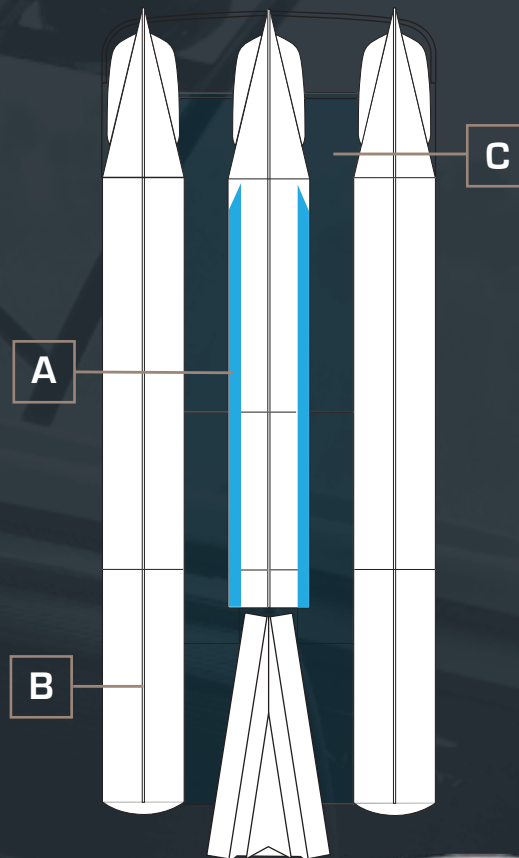

ESP: ELLIPTICAL SPORT PACKAGE

ESP is our top of the line in performance. It offers enhanced stability and water displacement with quick planing and handling characteristics that rival a fiber-glass sport boat. Designed for high horsepower applications, ESP is optional on outboard models and comes standard on all Bennington I/O models. It includes two 25" diameter outer pontoons with performance foils, a patented 32" Elliptical center pontoon with lifting strakes and an under deck wave shield. Optional Power-assist steering and available fuel tank upgrade is recommended in addition to the base package on engines greater than 150hp.

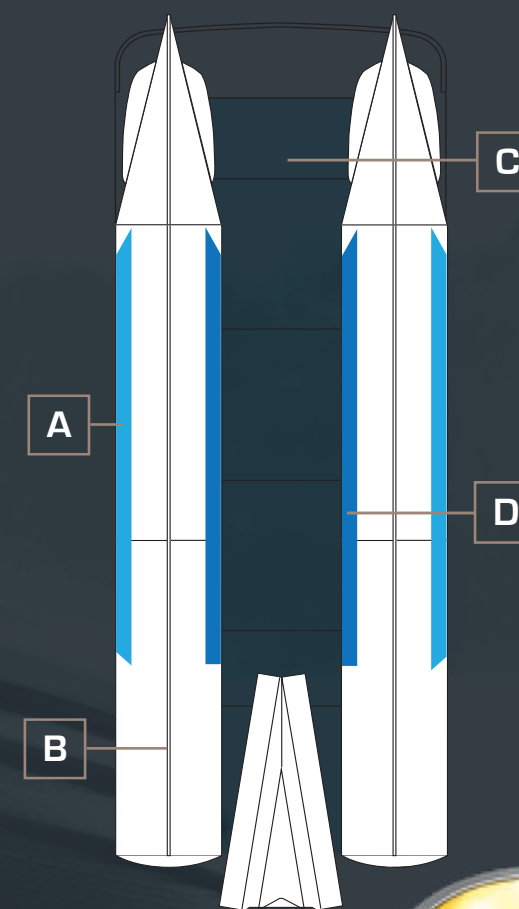

SPS: SPORT PERFORMANCE SYSTEM

The SPS hull offers handling and performance characteristics similar to ESP in an affordable package designed for engines 200hp and less. SPS includes 3 full-length 25" diameter pontoons, lifting strakes on the center pontoon, performance foils on the inside of the outer pontoons, solid round keels on all three tubes, an under deck wave shield and a 32-gallon transom fuel tank on select models. SeaStar® hydraulic steering option is recommended for engines greater than 115hp (SeaStar® is standard with SPS 200 package).

EXPRESS TUBE PACKAGE

The Express Tube Package offers increased bow lift and moderately increased speed and maneuverability as an affordable alternative to a full-fledged performance package. Package includes a modified center tube with lifting strakes, V-Keels on all three tubes, and a modified wave shield. Add SeaStar® hydraulic steering for engines greater than 115 hp (25" tubes required).

TWIN 32" ELLIPTICAL PERFORMANCE PACKAGE

Our exclusive Elliptical Pontoons combined with lifting strakes, performance foils, solid round keels and an under deck wave shield offer incredible two-tube performance. Each elliptical pontoon adds over 1,000 lbs. of additional buoyancy, allowing the boat to sit higher and run faster. These pontoons increase deck stability both fore and aft as well as side to side. Available as a Freshwater or Saltwater package. Saltwater package includes Saltwater anodes and sealed lifting strakes/performance foils.

INDUSTRY LEADING DESIGN AND CONSTRUCTION

Take the time to look under and around any Bennington. The quality and attention to detail is unsurpassed. With one of the industry's top designers and a team of thirteen skilled engineers, Bennington brings you the best in visual aesthetics, functionality and performance. On top of that we use only proven construction techniques and the highest quality materials. Since we take no design or construction shortcuts, Bennington pontoons will be the most luxurious, solid riding boats on the water. If you take time to compare, your choice will be Bennington.

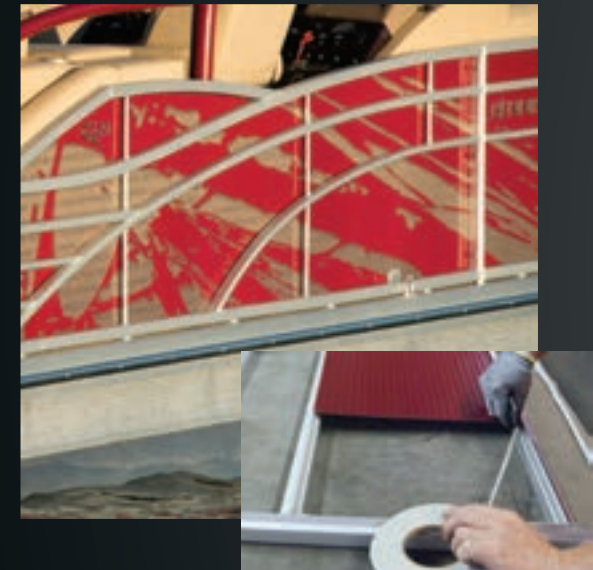

Trent Eekhoff, Co-President/Designer

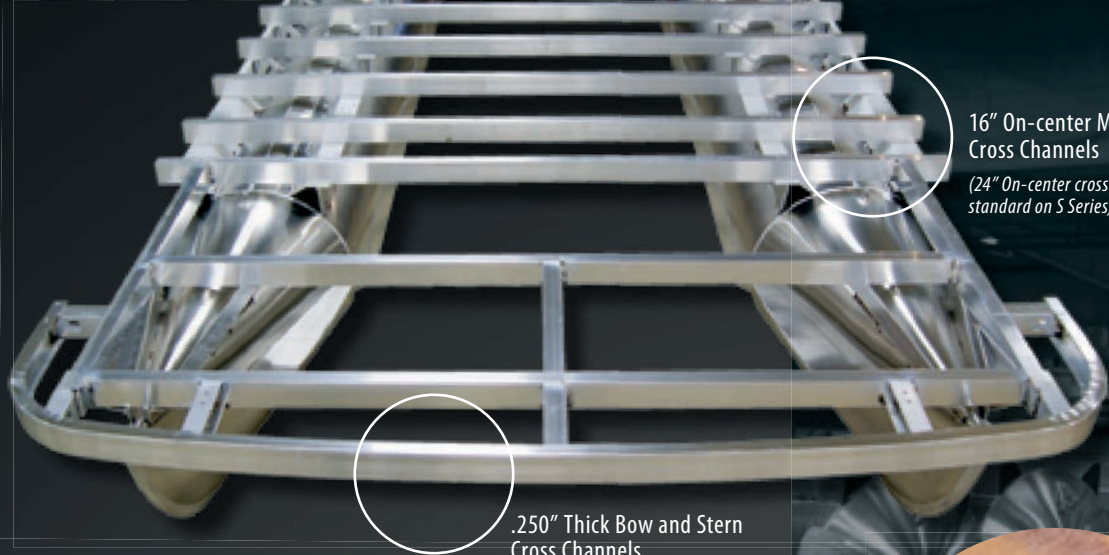

4-Sided Anodized Welding: 1.25" Rails are serrated for strength and good looks, welded on 4 sides (not 2) and anodized after welding for a superior finish.

Full-length Keels: Full length keels protect the tubes in shallow water and improve tracking while underway. Optional solid keels are recommended for use in salt water.

Heavy Duty Rail System with Drainage: The rail system is a solid, rattle free structure thanks to supportive aesthetics and a resilient sealing strip that's placed between each panel and railing touch point. Rail spacers are placed between the deck and rail allowing easy deck drainage and ventilation to reduce mold and mildew.

16" On-center Midship Cross Channels
(24" On-center cross channels standard on S Series)

.250" Thick Bow and Stern Cross Channels

Cross Channels: Our channels are twice as thick as those used by many of our competitors. Bennington's taller 3" channel provides more vertical strength than the typical 2" channel. The heavy-duty cross channels combined with our extruded M-deck brackets and Fanged Elevator bolted deck construction minimizes deck twisting ensuring your Bennington will provide the most solid, quiet pontoon ride in the industry. 3" tall, .250" thick cross channels standard in bow and stern locations. 3" tall, .125" thick cross channels standard in mid ship locations.

Bennington 1/4" thick Cross Channels

Competitor's Self-tapping Screws

Competitor's 1/8" thick Cross Channels

Stainless Fittings: All cleats and corners are made of stainless steel providing 3 times the strength of aluminum castings. They won't pit, corrode or discolor.

M-Deck Brackets: Extruded (.125") deck brackets are thicker and stronger than thin sheet aluminum brackets. Our stern deck brackets have **4 points of contact**, distributing weight evenly over the end cap, the strongest part of the tube. We space our deck brackets wider and lower than our competitors, greatly reducing the amount of twisting and racking the deck can experience while in rough water.

All flooring is glued and stapled.

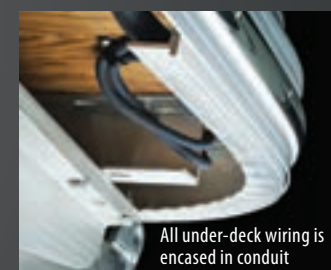

FIVE FOAM DENSITIES FOR ERGONOMIC COMFORT

THREE SELF-DRAINING CHANNELS

Our ergonomic design approach offers the industry's most sophisticated seating. All seating features Bennington exclusive **Icon™ Soft-Touch Upholstery**. The Infinity Topcoat is engineered for ultimate UV stability, easy cleaning, resistance to abrasions, mildew and stains. A Satin texture weave backing allows for smooth, tailored, instant-recovery upholstery with no puckering, or bagging. The unique high density foam used in five compressions provides the perfect combination of support and plush comfort.

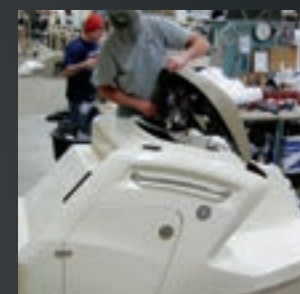

Deutsch Connectors & Wiring: All wiring harnesses feature marine grade, waterproof connectors.

All under-deck wiring is encased in conduit

Reinforced Bow Radius Channels: Bow decks and corners are reinforced with a .250" radius bow channel that supports the heavy-gauge anodized aluminum bow trim. Stronger than bow corner castings, they are less susceptible to damage.

One piece fiberglass consoles with plug and play waterproof Duetsch connectors virtually eliminates the possibility of electrical damage.

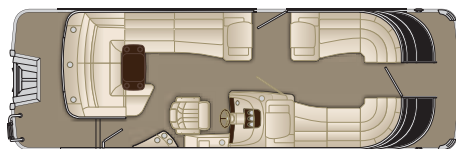

Each boat is individual wrapped with protective cloth and double shrink wrapped to ensure perfection at time of delivery.

BENNINGTON WARRANTY

Bennington takes pride in having high standards and has been honored with more quality and satisfaction awards than any pontoon maker in the industry. Awarded with the NMMA's Excellence in Customer Satisfaction 12 years in a row, our goal is to continuously improve our customer experience and provide boats that offer a lifetime of enjoyment. The CSI Award recognizes manufacturers who receive an exceptional satisfaction score for overall boat, engine and dealer experience.

BOW-TO-STERN WARRANTY

As a Bennington owner, the first five years are on us. * All materials and workmanship on your Bennington are covered – including carpet, upholstery and electronics. No hassles, no worries. The engine is covered by the engine manufacturer's warranty.

LIMITED LIFETIME DECK WARRANTY

As a Bennington owner, you receive a Limited Lifetime Warranty on the 7-ply, pressure-treated, marine grade wooden deck. Since we fasten the rails and deck directly through the under structure, Bennington decks flex less and will provide you with a lifetime of enjoyment.

LIMITED LIFETIME STRUCTURAL WARRANTY

As a Bennington owner, you receive a Limited Lifetime Warranty on the structure, pontoons, gates, channels, motor mount and seat frames. If anything goes wrong, we'll fix it. Season after season, your Bennington will be ready.

TRANSFERABLE WARRANTY

Bennington warranties are transferable through your local Bennington dealer adding to the resale value of your boat. The warranty period begins on the original owner's new boat purchase date. If the boat is sold during its warranty period, the standard warranty coverage will carry over to the new owner once the warranty is transferred through an authorized Bennington dealer.*

NO HAND-OFF TO OUR SUPPLIERS

Bennington doesn't hand off warranty responsibilities to our suppliers. When it comes to warranty claims, your Bennington dealer will take care of it directly with Bennington. After all, no one cares more about your satisfaction than we do.

NO PRO-RATING

Bennington boats carry the same valuable warranty whether it's the first day or the last day of the warranty period. We do not use a declining scale of value in our warranty, also known as pro-rating.

PARTNERSHIP WITH OUR DEALERS

Bennington dealers receive 100% of the retail shop labor rate for warranty repairs. This ensures that your warranty work is a priority and completed quickly with your satisfaction in mind.

**Extend your 2014 Bennington 5 Year Warranty to 7 by joining Club Bennington. Additional 2 Year Warranty is non-transferable.*

CLUB BENNINGTON

Get the most out of being a Bennington owner by joining the club. You'll automatically receive our extended **7 Year Warranty** upon registration.

Visit clubbennington.com and sign up today!
